Chakra Blends

Blended with Materia Aromatica certified organic oils

(5 ml set includes 2.5 ml Inner Reunion; 12 ml set includes 5 ml Inner Reunion)

BLENDS	Description	5 ml		12 ml		5% dilution in	
		Trade	Retail	Trade	Retail	Trade	Retail
Free the Spirit ~ Sahasrara (Crown) Chakra		£ 6.00	£ 7.50	£ 11.44	£ 14.30	£ 5.52	£ 6.90
	Free the Spirit is a combination of some of the most mysteriously transcendental fragrances, carefully blended to maximise their potential to instil a sense of utter peace. This is 'the peace that passeth all understanding' ~ the feeling that comes when we go beyond our rational mind						
Intuitive Insight ~ Ajna (Third Eye) Chakra		6.00	8.25	12.72	15.90	5.52	6.90
	Intuitive Insight is a blend of oils each renowned for its ability to encourage inner vision and intuitive wisdom. Based on the transcendent effect of Sandalwood, the fragrant queen of tranquility, it is designed to aid meditation, contemplation and all activity of the 'Higher Mind'						
Creative Resonance ~ Vishudda (Throat) Chakra		5.52	6.90	10.56	13.20	5.00	6.25
	Creative Resonance is a blend of oils whose pungent, camphoraceous and aerial notes bespeak of clarity and projection ~ of dynamic communication. Its subtle power to activate the Throat Chakra can help us to find our individual voice and creative drive						
Inner Reunion ~ Anahata (Heart) Chakra		11.76	14.70	22.08	27.60	12.00	15.00
	Inner Reunion, with its beautifully floral-rose fragrance, is the perfect blend of oils to harmonise and bring buoyancy to the Heart Chakra. Not only is our capacity to give and receive enhanced by this, but our ability to feel love at the very centre of our being	/ 2.5 ml	/ 2.5 ml	/ 5 ml	/ 5 ml		
Dynamic Presence ~ Manipura (Solar Plexus) Chakra		5.52	6.90	10.56	13.20	5.00	6.25
	Dynamic Presence is a blend of oils of a sweet and spicy character ~ activating, nourishing and subtly relaxing. Its capacity to stoke our 'inner fire' and restore a sense of our true potential makes it useful for states of despondency, indecision and a lack of self-confidence						
Sensual Awakening ~ Svadisthana (Sacral) Chakra		11.76	14.70	22.08	27.60	8.00	10.00
	Sensual Awakening is a blend of oils of a warm and floral, gently spicy-exotic nature, designed to enhance and bring to the fore the sensuous aliveness of the Sacral Chakra. It works not only to release the flow of sexual energy, but of instinct, creativity and all life-affirming desire						
Resourceful Strength ~ Muladhara (Base) Chakra		5.52	6.90	10.56	13.20	5.00	6.25
	Resourceful Strength is a blend of oils rich in woody and rooty notes that serve to stabilise and fortify. Their power to restore the resourcefulness of both the Earth Element and of the Shakti life-principle empower us to endure and overcome all worldly obstacles

Meridian Blends

Blended with Materia Aromatica certified organic oils

Each Materia Aromatica Meridian blend is formulated to activate the Chi-energy in a specific Meridian or Channel. Diluted in an appropriate carrier oil, it may be applied as part of a full body treatment or massaged directly into the Meridian for which it is intended. It will not only help to enhance the energetic function of the Meridian's associated organ, but harmonise the psycho-spiritual dimension which the organ governs.

(5 ml set includes 2.5 ml Gentle Embrace; 12 ml set includes 5 ml Gentle Embrace)

BLENDS	Description	Meridian Element	5 ml		12 ml

Indian Head Massage Blends

Blended with Materia Aromatica certified organic oils

The increase popularity of Indian Head Massage has prompted Gabriel Mojay & Felicity Lawrence to design a small range of essential oil blends for use in the technique ~ as part of their distinctively aromatic approach to this traditional therapeutic art. The Following eight blends will meet the needs of a wide range of clients and will enhance the benefits of any Indian Head Massage treatment.

They can also be added to a shampoo and conditioner or a hair rinse.

BLENDS	Description	5 ml		12 ml	
		Trade	Retail	Trade	Retail
Decongest & Clarify <i>Eucalyptus Dives, Eucalyptus radiata, Black Spruce, Pine & Rosewood</i>	A blend of essential oils with widely-acknowledged decongestant properties - for sinus congestion or catarrhal cough	£ 4.00	£ 5.00	£ 7.68	£ 9.60
Energize <i>Cardamon, Ginger, Orange, Bergamot & Patchouli</i>	Just as it says - a blend to raise one's vital energy and combat physical and mental fatigue	4.00	5.00	7.68	9.60
Harmonize <i>Frankincense, Lavender, Bergamot, Roman Chamomile & Vetiver</i>	A blend to help release nervous tension, calm the nerves and restore one's sensual mental-emotional equilibrium - a formula designed to restore inner harmony	5.80	7.25	11.16	13.95
Luxuriate & Relax <i>Jasmine Grandiflorum, Mandarin, Geranium, Lavender & Vanilla</i>	A blend to encourage a state of deep relaxation and to offer a chance to luxuriate in the Queen of Flowers' fragrance	11.00	13.75	21.12	26.40
Nourish the Roots <i>Sandalwood, Palmarosa, Vetiver & Ylang Ylang</i>	A blend of essential oils that nourish and restore the roots of the hair - indicated in particular for a dry scalp	5.80	7.25	11.16	13.95
Purify & Refresh <i>Grapefruit, Lemon, Palmarosa, Cypress & Sandalwood</i>	A blend to help promote cleansing and detoxification - or simply to refresh and revive	5.00	6.25	9.60	12.00
Regenerate the Scalp <i>Rosemary cineole 1.8. Rosemary verbenone, Thyme linalol, Cedarwood, Rosewood & Lavender</i>	A blend designed to enhance the flow of capillary circulation in the scalp - and thereby to help regenerate the hair	5.52	6.90	10.56	13.20

India's Fragrant Garden

Absolutes & attars sourced and selected in India

Aromatic plants and their extract have for centuries played an integral role in the life of India, employed by the peoples of its earliest civilisations through to the diverse cultures that abound today. Spiritual practices, the preparation of food, traditional medicine, bodily adornment and beauty preparations are steeped in the traditional use of fragrance.

It has been suggested that the word 'scent' is derived from the Sanskrit term sugandha, meaning 'aromatic paste' - evidence of the age-old role of natural fragrance in the daily life of people living in the Indian subcontinent.

The natural variation of India's soil type, topography and climate allows for a huge diversity of flora. A wide range of essential oils, floral absolutes and attars can be extracted from "earthy roots like vetiver, costus, valerian and angelica; exotic flowers like tuberose, champaca, rose, jasmine and frangipani; aromatic spices like cardamom, pepper, turmeric and ginger; fresh grasses such as citronella, palmarosa, lemongrass and gingergrass; healing herbs like peppermint, spearmint, patchouli and artemisia; and precious woods such as sandalwood and agarwood."

The supplier of our special Indian oils travels extensively, visiting various growers and distillers several times a year. Every care is taken at each step of the production process, from growing the fragrant plants to testing the end product.

Absolutes are solvent extracted. This method is used to extract aromatic compounds from plants that cannot sustain steam distillation. This is particularly the case for flowers such as jasmine, rose, tuberose, frangipani. Animal or goose fat was traditionally used as the solvent. It has now been replaced by a petrol by-product, hexane. Only minute traces of the solvent remain in a good quality absolute.

Attars are made using an traditional Indian recipe. The method used resembles steam-distillation. Plants are hydro-distilled to extract the aromatic compounds that are collected in a container filled with sandalwood essential oil.

Vegetable Oils

Oils listed as organic are certified by Soil Association Certification Ltd

The quality of vegetable oils is paramount when used in a treatment as a carrier for essential oils. When refined, they can have undergone up to 13 physico-chemical operations of "purification". As a result of this, they have lost their vitamin E and F and have gained the ability to generate free radicals in the body after the exposure of fatty acids to heat.

Materia Aromatica vegetable oils come from carefully selected certified organic seeds and nuts. Their oils have been extracted by cold pressure on a small press turning at a low speed. They have gone through no refinement processes, have not been discoloured or deodorised.

Vegetable oils are a rich source of vitamin E. Usually low in saturated fats, they contain two types of unsaturated fatty acids in various proportions: mono-unsaturated (oleic-acid) and poly-unsaturated also called vitamin F. The latter is a powerful protector of the cardio-vascular system and an anti-cholesterol agent.

Vegetable oils have a short shelf life. It is recommended to buy small quantities often.

Vegetable Oil Blends

The following blends have been designed, using Materia Aromatica organic vegetable oils only. All ingredients are certified by Soil Association Certification Ltd. The oils are cold-pressed and filtered. They have not gone through any refining process and have not been deodorised or discoloured.

The ingredients for the following blends have been carefully chosen to maximise the therapeutic properties of the blend for a particular skin type or application.

The blends can be used as part of an aromatherapy treatment. They can also be used on a daily basis, as a body oil. 1 to 3% essential oil can be added if desired.

TISSUE REPAIR

Argan, Rosehip & Borage

The blend combines 3 oils most suited to encourage tissue repair and cell regeneration. Argan has amazing softening and nutritive qualities. It is a free-radical scavenger and is rich in Vitamin E. It combines well with Rosehip which works at a deep level to reduce scarring and discolouration. Borage, with a high GLA content, will contribute to re-hydrate and regenerate the tissues.

To use locally over scar tissue, deep wrinkles or damaged skin. 0.5% to 1% of helichrysum essential oil can also be added if desired. Do not apply over open scars but wait until the tissues have healed.

The blend can also be used to help prevent stretch marks. Use twice a day after a bath or shower or whenever it is needed when the skin gets taut and itchy. It would also be useful after the birth to help the tissues return to their normal shape.

AFTER SUN OIL

Sesame, Avocado, Macadamia & Rosehip

The blend combines oils which will promote re-hydration of the skin and will help regenerate cells and tissues damaged by a long exposure to the drying and burning effect of the sun.

Apply after a day in the sun or on sunburns.

Caution: Sesame naturally contains sun protection agents. However this is not enough to protect the skin from the UV rays of the sun and the oil must not be used instead of sun cream.

Phytols ~ Plant Macerations

Oils listed as organic are certified by Soil Association Certification Ltd

Phytols are macerations in a vegetable oil base of plants whose essential oils are difficult or even impossible to extract. The plant materials are steeped in a vegetable oil base and are left to brew for 3 to 4 weeks during which time the plants release the lipid soluble constituents they contain. The preparation is then filtered off. Sunflower or Olive oils are usually used as the vegetable base since they are the 2 most stable oils with the longest shelf-life.

Materia Aromatica phytols are macerations in sunflower. It has a light texture, is readily absorbed by the skin and is traditionally a recommended base oil for massage therapies.

Floral Waters

Waters listed as organic are certified by Soil Association Certification Ltd

Floral waters or Hydrolats are the remaining pure waters of the steam distillation of plant materials. They contain a minute quantity of essential oil made of the very few water soluble molecules that contain all the therapeutic principles of the plants. They may be clear or slightly coloured. Their aroma is fragrant and fresh, reminiscent of, but somewhat different to, the natural aroma of the plants and flowers from which they have been distilled.

Stored in a cool place, they will keep for a few years. A sediment may appear after a certain length of time. It is not a sign of staleness and will not affect the properties of the water and the safety of its use. It can be removed by simply running the hydrolat through a sieve.

Good quality hydrolats do not contain any alcohol, solvent or preservatives.

Mostly known as excellent toners for the skin, they also have many varied uses: in the bath in addition to or instead of essential oils; in a burner to disperse a long lasting aroma or in a spray to add a delightful subtle fragrance to your home.

Essential Waters

Waters listed as organic are certified by Soil Association Certification Ltd

Essential Waters are an innovative product.

Through a process of steam released through hydrodistillation at low temperature, the essential oil is solubilised in pure mountain spring water. The water is then filtered to remove any bacteria. A concentration of 0.5 to 2% can be achieved. This process can be used for any essential oil and absolute.

There is no additive added to this product - only pure spring water and organic essential oil which acts as a natural preservative giving the essential water a better stability and longer shelf life than a floral water. It is very different to a hydrosol or floral water in many ways.

STRONGER AROMA

The percentage of essential oil contained in a hydrosol is very minimal and varies from 100 mg/L to 500 mg/L. The essential water is 3 to 5 times stronger than the hydrosol.

The hydrosol only contains the water soluble compounds and thus an incomplete version of the essential oil. The essential water contains all the molecules that make up the essential oil. The aroma is not only stronger but also reveals the true fragrance of the oil.

USES

It is a versatile product that can be used in many ways.

- A face sprinkler for the hot summer days
- In any cream, cosmetic preparations
- In a foot bath
- In the bath
- A room / loo freshener

Base Products

Our natural base products are an emulsion of vegetable oils and sterilised water created by the addition of a vegetable emulsifying wax. Grapefruit seed extract and Rosemary oleo-resin act as a natural preservative.

The creams and gel do not contain any preservatives, chemicals, animal or petroleum by-products. Unfortunately, as a result, their shelf-life is short, no more than a few weeks. However as many preservatives are in fact skin irritants, we feel it is worth keeping the product pure.

They are made per order to ensure the freshness and quality of every batch. Please be aware that you need to start using the creams as soon as, or shortly after you have received them.

Paraben

For those who prefer to buy a larger quantity and to store it for a few months, such as 500 ml or 1L, we offer the possibility of adding paraben to the creams in order to extend their shelf-life. Paraben is a petroleum by-product and is the most common preservative used in the cosmetic industry. Only the smallest quantity is added. It is a compromise to preserve the cream which is still a natural product. Please let us know at the time of ordering if you wish paraben to be added to your products.

* * * * *

The base creams and body milks are available with the following vegetable oil blends to suit a particular skin type. They all have the same texture. Their richness depends on the type of oil blend used, jojoba being the lightest and calendula the richest.

DRY SKIN ~ Safflower, Apricot, Macadamia, Calendula & Evening Primrose

COMBINATION SKIN ~ Jojoba & Calendula

MATURE SKIN ~ Macadamia, Evening Primrose, Rosehip & Calendula

STANDARD with just Jojoba

Scar Tissue Balm	Macadamia, Rosehip & Evening Primrose with essential oils of Lavender, Frankincense & Rose	Apply in circular motions at least once a day over scar tissue	9.84	12.30

Bath Oils

Blended with Materia Aromatica certified organic oils

Ordinarily essential oils are not directly water soluble. When added to a bath they will form tiny particles on the water surface. Materia Aromatica bath oils will improve the dispersal of the essential oils throughout the bath water. This will enhance the absorption of the essential oils and their medicinal benefits whilst at the same time ensuring a rich and fragrant bath.

The base for these bath oils is a vegetable based dispersing agent made with vegetable glycerin, sunflower oil, coconut oil and beeswax. It also contains lecithin, which acts as an emulsifier. Vitamins E and C along with Rosemary extract and Propolis act as an anti-oxidant and a preservative.

The bath oils are very concentrated. One capful is enough to fragrance a bath effectively. They also have a long shelf-life and can be kept for as long as two years.

They come in a 50 ml bottle which contains 20 to 30 baths.

BATH OILS	Trade	Retail
Children's ~ Mandarin, Vetiver, Bergamot, Roman Chamomile & Lavender	£ 12.08	£ 15.10

Sensual Awakening ~ Jasmine Sambac, Neroli, Patchouli, Geranium, Bergamot & Lavender	18.32	22.90

Crystal Deodorants

ORIGIN

Used for centuries by native people, these crystal stones originate from the Philippines where they are naturally created in the earth surrounding volcanoes. They are of 100% natural mineral salts.

CHEMISTRY ~ No aluminium chlorohydrate or chlorohydroxide

The basic chemical compound of these crystals is Ammonium Aluminium Sulfate. It must not be mistakenly identified as Aluminium Chlorohydrate which is the compound commonly used in ordinary deodorants as the active bacteria eliminating ingredients. This can create rashes and allergic reactions for people with sensitive skins.

Aluminium is harmless as a sulfate compound but can be dangerous when attached to a Chlorate. The same principle applies to the Hydrogen molecule: combined with Oxygen, it turns into water which is vital to the body; combined with Chlorate, it becomes a strong acid.

ANTI-BACTERIAL ACTION ~ Stays out of the body

The molecular structure of Aluminium is so big, that the molecules, when applied on the skin, cannot penetrate the skin, but stay as a thin film on the surface. They have a very strong anti-bacterial action which will eliminate the bacteria causing body odour for more than 24 hours. The crystal does not stop the secretion of sweat and does not prevent in any way the normal function of the sweat glands. It is hypo-allergenic, will not burn or irritate the skin and is ideal for sensitive skin. It is odourless and will not compete with your favourite perfume. The microscopic film which remains on the skin after application will not stain clothes.

The crystal also has vaso-constrictive properties. Used after shaving, it will tighten the pores of the skin and prevent or stop bleeding.

It comes as:

- * **A mini Stick - 80 Gr** £ 4.00 (Retail £ 5.00)
- * **A large Stick - 120Gr** £ 6.95 (Retail £ 8.70)
- * **A Stone in a basket - 120Gr** £ 6.52 (Retail £ 8.15)
- * **A Spray - 240 ml** £ 7.96 (Retail £ 9.95)
- * **A Roll-on - 90 ml** £ 4.76 (Retail £ 5.95)

To use the sticks and the stone - Pass the crystal under cold water (hot water will dissolve the crystal more quickly) and rub on the skin

The spray and roll-on are to be used as sold

Soaps

Hand-made with Materia Aromatica certified organic oils

Hand-made with Materia Aromatica organic vegetable oils & essential oils

Materia Aromatica soaps are made following the traditional recipe of the 'castille' soap, also known as 'savon de Marseilles', which was developed in the south of France in the XIXth Century.

It is the result of a chemical reaction between an acid and an alkali base. In the case of the 'castille' soap, olive oil provides the acid base and sodium hydroxide the alkali base. The reaction between the two bases is called saponification and takes about three weeks to occur. During this curing period, the sodium hydroxide is being neutralised and transformed to provide a soap which is made with, but does not contain any sodium hydroxide. Unfortunately it is not possible to make soap without the use of sodium hydroxide.

All sorts of fats can be used in soap making: vegetable, animal as well as mineral oils. Fats have all got their own characteristics and properties and will produce a soap of varied textures: soft or hard, with little or copious lather, quick dissolving or long-lasting.

A good quality bar of soap is the most natural, sensual and safe way to cleanse the body. It should be gentle and soft to the skin and should not leave it dry. The fats used in the making process are not subjected to heat or any other chemical treatments. They keep their therapeutic characteristics and will bring to the skin their moisturizing properties.

Materia Aromatica soaps are made using only organic ingredients. The base is made with sunflower, coconut, palm and olive oils. The proportion of each oil has been carefully chosen to produce a hard and long-lasting bar of soap which will be gentle to the skin. They are fragranced with 3% essential oils which allows them to keep their aroma for many weeks. They are free from any preservatives, colourings or animal by-products.

They come in square bars of about 100g. They are presented in a box decorated with a delicate drawing evocative of the fragrance of the soap.

Each bar **£ 5.20** (Retail: £ 6.50)

* **Children**

Mandarin, Roman Chamomile, Bergamot, Lavender & Vetiver

* **Geranium & rose petals**

* **Joie de Vivre**

Bergamot, Geranium, Sweet Orange, Cardamon & Petitgrain
